

Introduction to the Saferpay Installation

First of all, thank you very much for purchasing the Saferpay module and the trust your confidence in us.

Before you can begin with the installation you require the access data to the administration interface of Saferpay. For the configuration of the module you need the Account-ID that can be found in your customer account at any time. You will find the link at www.saferpay.com > Customer Centre > Saferpay Login.

Module Installation in the Shop (VirtueMart 2.x)

Saferpay

1. Extract the ZIP file sent to you by us (e.g. with WinRAR; <http://www.winrar.de/>)
2. Log into the back-end of your shop
3. Go to "Extensions->Install/Uninstall"

Saferpay Joomla! VirtueMart 2.x

4. Enter the ZIP Archive, which you will find in the extracted archive, into "Upload package data"
5. Click "Upload Data & install"
6. Furthermore, you must copy the entire CustomwebLibs folder onto your server into the folder "Libraries".

Installation Manual

Configuration of the Module in the Shop

Configuration of the Main Module

Autor: Customweb GmbH

19. February 2013

Configure and activate the module in the shop back-end under Extensions > Plugins > Saferpay.

- Insert the Account ID provided to you by Saferpay.
- Choose the operating mode. **Do not enter your Account ID in case you want to work in the test mode. The test ID will automatically be inserted.**

Extensions available in the shop: [Configuration address VirtueMart 2.x Installation Manual](#)

- You can enter your shop-domain in "Payment Description".

Configuration of the Payment Methods

Go to Components > VirtueMart > Shop > Payment Systems.

Add a new entry for each payment method you wish to offer in your shop.

Make sure that you have marked 'Saferpay' as Payment Method in the tab "Information on the payment method"

as well as in the tab "Configuration"

Testing the Module (Saferpay)

You can test Saferpay modules by switching the module to 'Test Mode' and then conducting test payments. The test credit card data is then automatically entered in the payment mask of Saferpay. You can enter anything under credit card holder and security number.

Test Credit Card Data

In order to test the module, please go to <http://www.sellxed.com/en/testing>. All relevant test card data is listed there.
